## Research Interests

---

- **Statistics and statistical genetics.** Effect size estimation, power analysis, nonlinear genetic effects, method development, heritability and genetic distance metrics, numerical linear algebra, MCMC methods for Bayesian inference, computation and simulation.
- **Psychology and psychometrics.** Measurement error, mood disorders, psychotic disorders, developmental psychopathology, mortality risk, externalizing behaviors.
- **Metascience.** Publication and citation biases, falsifiability, identification of spurious findings, reproducible research.
